

## Factsheet

**A secure video collaborative platform that is reinventing remote interaction with its groundbreaking "hyperpresence." Simple. Flexible. Intuitive.**

Whether for the health, education, public safety or technical support sector, tools that facilitate collaboration and remote communications have enormous potential, but are underused. Reacts, a next generation digital web platform, is a game changer.

### Key features

**The private encrypted Reacts network ensures a highly secure virtual environment:**

- Servers hosted in secure data centres in Quebec
- Secure tunnels with TLS 1.2 and 256-bit AES encryption
- HIPPA and PHIPA compliant

**Reacts provides simple, practical tools designed for an all-in-one experience:**

- 2GB of cloud space included with every license
- Secure messaging
- High-quality audio-video conferencing
- Remote application sharing
- Remote desktop control
- Live file transfers
- Snapshots, video recording and annotations
- Creation of checklists and reports

**Reacts delivers an immersive experience that promotes effective communications:**

- Multiple video streams
- Augmented reality and real time image overlay
- Virtual 3D objects
- Sharing of multimedia elements

## Useful information

**License fee of \$84 per year for an individual license, which includes:**

- Unlimited use of platform
- All updates and upgrades

Note: Other arrangements possible for organizations according to needs.

### Technical support:

- Go to [reacts.com](https://reacts.com) and click on the "Support" tab
- You'll find tutorials, an FAQ section and a tech support email form
