

Quality Manager

In this role, you have the opportunity to

The Quality Manager will create and maintain a formalized Quality Management System (QMS) driving the Philips' Quality culture. We are looking for a candidate that has strong technical understanding of software development, mastery of QMS and strong Project Management skills to provide guidance to the organization while maintaining its successful environment.

You are responsible for

- Leading the design, implementation and formalization of a QMS that drives the Philips Quality culture.
- Maintaining and growing the capabilities of the QMS to adapt to increasing market demands for the product.

You are a part of

The Quality Manager is a functional manager and part of the leadership team within a thriving software enterprise developing a secure, versatile, integrated communication platform featuring augmented reality capabilities that enables its users to interact, assess, work, teach and collaborate, to help improve the efficiency and quality of interactions between all members of the care team, including the patient.

To succeed in this role, you should have the following skills and experience

- Canadian work authorization is a precondition of employment. The company will not consider candidates who require sponsorship for a work-authorized visa.
- BS in Engineering or equivalent with emphasis in Computer Science or related field.
- 5+ years of experience related to Software Quality and Quality Systems for software focused companies.
- Experience in developing and deploying scalable Quality Systems for small, emerging, fast growth technology driven organizations.
- Experience in all aspects of a Quality System, with preference for focus in Design Controls, Document Controls/cGMP, CAPA, and Verification/Validation.
- Have familiarity with all of and working knowledge of at least one of the following standards:
 - ISO 13485/ISO 9000;
 - 21CFR820;
 - IEC62304;
 - IEC82304;
 - IEC27001;
 - Canadian Medical Devices Regulation (SOR/98-282).
- Have technical familiarity with and working knowledge of at least one of: Data structures, SaaS, SaMD, Software Security. End to end project management experience.
- Comfort working in a highly collaborative environment.
- Must have verbal and written technical literacy in both French and English
- ASQ Certification Manager of Quality/Organization Excellence.
- ASQ Software Quality Engineer preferred.
- 10+ years experience with exposure to Software as a Medical Device preferred.
- Experience in working in a development environment using Agile Methodologies.
- Experience with "first certification" to a quality standard for QMS.
- Project Management Certification (PMI/PMBOK Certification) preferred.

In return, we offer you

The opportunity to take a leadership role in a rapidly growing innovative company, in a highly sought-after technology with the backing and support of a multi-billion dollar organization.
